

FIT Test

COLON CANCER SCREENING

Everyone 50 and older should talk to their doctor about colon cancer screening. Polymedco's FIT test is a simple, affordable, at home screening kit requiring a small stool sample.

Important questions to discuss with your doctor:

1. Have you ever been screened for colon cancer?
2. Has anyone in your family been diagnosed with colon or rectal cancer?
3. What are my risk factors for colon and/or rectal cancer?
4. Do I have any symptoms?
5. What are my screening options?
